INTRODUCTION

Did you know that penis size can vary from less than 7 cm to more than 20 cm when erect?. Did you know that some penises develop a curvature that can interfere in sexual relations?. Did you know that there is an old technique used to allow the penis to grow both in length and girth, and to also correct curvatures? Did you know that after a penile surgical procedure it is necessary to stretch the tissues in order to avoid the loss in length due to retraction effect while healing?.

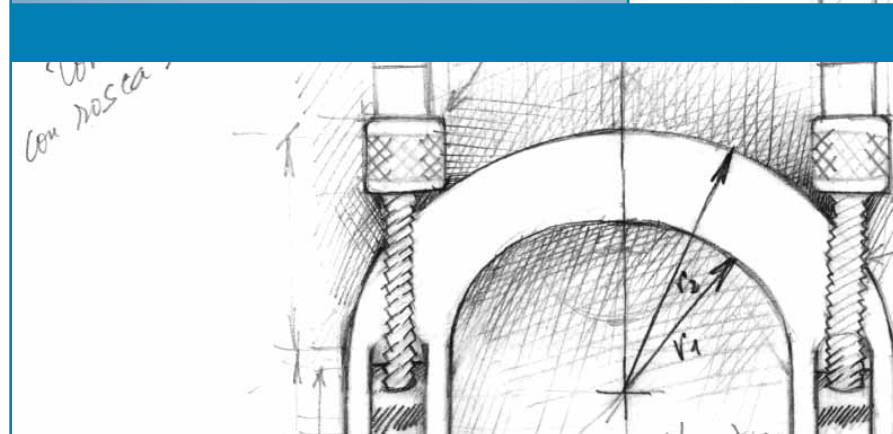

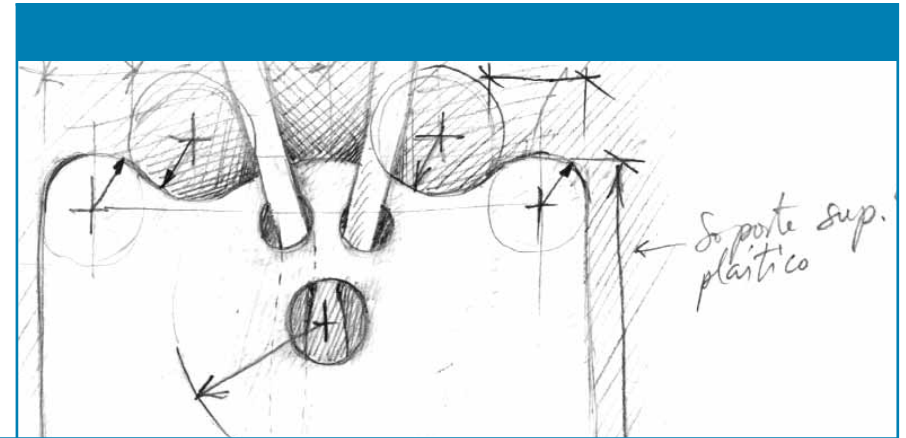

Andromedical® was created in 2000 to answer all these questions and to offer a reliable medical solution to doctors (urologists, andrologists, sexologists) and to all men. **Dr. Eduardo Gómez de Diego** saw more than a thousand men in his clinic before starting to investigate a proper response to them with the **Andropenis®**. Today, there is still a lack of information regarding penile issues. Men are less likely than women to visit a doctor, or to talk about sexual related topics. Nonetheless, there has been an upsurge recently regarding sexuality or men's health content in the internet, magazines, radio stations and tv channels.

The mass media have come to understand the importance of including sex topics in their general health-lifestyle contents.

How has **Andromedical®** contributed to all this? By developing a strategy towards the media, consisting of offering all kinds of scientific data, general information and press releases related to penis size and the scientific explanation behind the **Andropenis®**. **Andromedical®** has made available to the media more than a dozen studies carried out by prestigious urologists, presented at international medical congresses and published in medical journals.

Regardless of the infinite number of web pages dedicated to the penis, men, and the public in general, do not know that there is a medical, simple, non surgical answer to curvatures or to penis size. And there is. **Andropenis®** carries **CE** Health Authorities Certification as **Type 1** medical device, and the company has been certified with the quality standards certification **UNE-EN-ISO 9001:2000** and **UNE-EN-ISO 13485:2003**. It is the world's leading company offering a guaranteed solution to penis

size and curvature correction. There is a growing network of doctors worldwide working with the **Andropenis®**, and offering advice to patients regarding the treatment. Andromedical has also its own department of professionals with medical training offering information and support for clients per phone and e-mail.

EL MUNDO / EL APARATO ESPAÑOL QUE ANHASTA

El tamaño, en China, sí importa

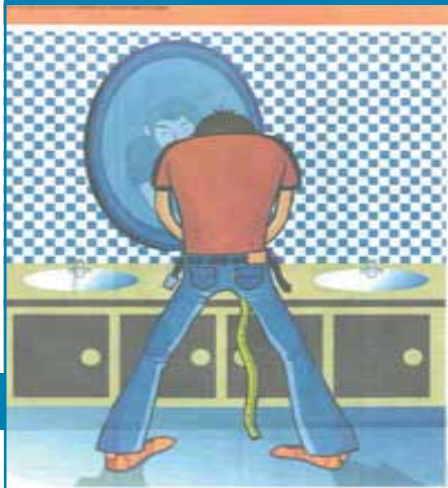

El tamaño del pene es un tema que ha despertado mucho interés en los últimos meses. En España, el tamaño promedio del pene es de unos 13,5 centímetros. En China, sin embargo, el tamaño promedio es de unos 17 centímetros. Esto ha llevado a algunos investigadores a estudiar el tamaño del pene en diferentes culturas y épocas. Los resultados muestran que el tamaño del pene puede variar significativamente entre diferentes grupos étnicos y geográficos. Esto puede deberse a factores genéticos, ambientales o culturales. El estudio también encontró que el tamaño del pene puede cambiar con la edad y el estado de salud. Por lo tanto, el tamaño del pene no es necesariamente un indicador de la salud o la fertilidad de un hombre.

Almanac: Estudio afirma que el penis promedio mide 14 centímetros

11/11 - El estudio afirma que el penis promedio mide 14 centímetros. Este estudio fue realizado por un equipo de investigadores de la Universidad de California, San Diego, y se publicó en la revista científica 'The Journal of Sexual Medicine'.

Los investigadores analizaron los datos de más de 15.000 hombres de diferentes países y edades. Los resultados mostraron que el tamaño promedio del penis es de 14 centímetros cuando está erecto.

El estudio también encontró que el tamaño del penis tiende a disminuir con la edad. Los hombres más jóvenes tienen penises más grandes que los hombres más mayores.

Los investigadores concluyeron que el tamaño del penis no es un indicador de la salud sexual o de la fertilidad. El tamaño del penis varía naturalmente entre los hombres.

Penis boyunda ilk 3 sırayı Avrupalılar aldı, Türkler 'ortalama' çıktı

MEHMET ÇİFTÇİ / İspanya DHA

DÜNYANIN çeşitli ülkelerinde yapılan bir araştırmanın sonuçlarına göre, erkeklik organı boyutları konusunda ilk 3 sırayı Avrupalılar yerleşti. Hindistan ve Güney Koreli erkekler penis boyunda sonuncu olurken, Türklerin ise 'ortalamanın ne altında, ne de üstünde' yer aldığı ortaya çıktı.

Dünyaca ünlü Ürolog Dr. Eduardo Gomez de Diego'nun sahibi olduğu Andromedical şirketi tarafından dünyanın çeşitli ülkelerinde 2 bin kişi üzerinde yapılan bilimsel araştırmada, dünyada penis boyunun ülkeden ülkeye 7 santimetreye yakın fark gösterdiği belirlendi.

Cinsel organlarının boyutu bakımından Fransız erkeklerin 16 santimetreyle başı çektiği kaydedilen araştırmada, İtalyanlar 15 santimetreyle 2'nci sırada, Almanlar ise 14.4 santimetreyle 3'üncü sırada yerleşti. Araştırmaya göre bu alanda dünya ortalaması ise 14 santimetre. Türkiye ve İspanya'nın başı çektiği bu ortalama Balkan ülkeleri de giriyor.

Penis boyunu 3 İLA 5 SANTİMETRE KADAR UZATMAK MÜMKÜN

Andromedical şirketinin yaptığı araştırmada penis uzunluğunda Avrupa kıtası, Amerika kıtasına 'fark atıyor'. Avrupalı erkeklerde penis uzunluğu ortalaması 16 santimetreyi bulurken, bu oran ABD'nin başı çektiği kıtada ancak 12.9 santimetreye kadar çıkabiliyor. ABD'yi 12.7 santimetreye ile Venezuela ve 12.4 santimetreye ile Brezilya izliyor.

Penis boyunda en düşük ortalama ise Asya'da görüldü. Bu kıtadaki en kısa penisler 9.2 santimetreye ile Güney Kore'de bulunuyor. Herifler ise dünyadaki en kısa penis unvanında 10.2 santimetreye ile ikinciliği almış durumdadır.

Bu arada araştırmaya yapan şirket ayrıca, penisin 3 ila 5 santimetreye arasında uzatılmamış olan bir klinik müdahaleyle mümkün olduğunu açıkladı. Andromedical şirketine göre penis boyunu uzatmak isteyen erkeklerde yüzde 97 oranında başarı elde edilebiliyor.

Studie zu Penislängen: Franzosen sind am besten bestückt

Leid man sich über angeblich zu kleine Penisgrößen auf, so ist das gar nicht so schlimm. Eine internationale Studie zeigt, dass die Franzosen mit einer durchschnittlichen Penislänge von 16,7 Zentimetern am besten ausgestattet sind.

Die Studie wurde von dem Urologen Dr. Eduardo Gomez de Diego durchgeführt. Er untersuchte die Penisgrößen von über 15.000 Männern aus verschiedenen Ländern.

Die Ergebnisse zeigen, dass die Franzosen mit einer durchschnittlichen Penislänge von 16,7 Zentimetern die besten sind. Auf dem zweiten Platz stehen die Italiener mit 15,4 Zentimetern, gefolgt von den Deutschen mit 14,4 Zentimetern.

Die Studie zeigt auch, dass die Penisgröße mit dem Alter abnimmt. Die jüngsten Teilnehmer hatten im Durchschnitt die größten Penise.

Die Studie ist ein Beitrag zur Aufklärung über die natürliche Variation der Penisgröße. Sie zeigt, dass die Penisgröße kein Indikator für die sexuelle Gesundheit ist.

DID YOU KNOW THERE ARE DIFFERENCES IN SIZE IN THE WORLD?

Did you know there are differences in penis size in the world? A new study from the University of California, San Diego, has revealed that the average penis size is 14 centimeters when erect.

The study analyzed data from over 15,000 men of various ages and nationalities. The results showed that the average penis size is 14 centimeters when erect.

The study also found that penis size tends to decrease with age. Younger men have larger penises on average.

The researchers concluded that penis size is not an indicator of sexual health or fertility. Penis size varies naturally among men.

FOR MEN

Vuoi sapere quanti sono 18 centimetri?

Moltissimi uomini in tutto il mondo sanno già cosa vuol dire aumentare le dimensioni del proprio pene in più di 4 cm di lunghezza e 1 cm di spessore grazie all'Andro-Penis, un apparato medico che riesce in pochi mesi ad aumentare le dimensioni del pene, in modo semplice, comodo e con risultati permanenti.

Cambia di taglia ti cambierà la vita

el placer se mide en centímetros

El Andro-Penis es un aparato médico para el aumento de pene en cirugía, basado en el principio físico de la tracción, que consigue un alargamiento de 4 cms. de longitud y un engrosamiento de 1 cm.

En sólo unos meses de tratamiento, descubrirás los resultados.

andro penis

the only effective non-surgical solution for the treatment of Peyronie's Disease

AndroPenis is a medical device used to apply progressive traction force of between 400 to 1500 grams to treat penile curvatures and Peyronie's Disease.

AndroPenis offers doctors and patients an effective and affordable method for:

- Treatment of Peyronie's Disease or penile curvatures
- Treatment of penis enlargement without surgery
- Post-Operative treatment of penile surgery to avoid scar retraction
